Expand your practice beyond the screen with this collection of free printable worksheets for pre-k, preschool and kindergarten kids. Here you will find worksheets on every subject from the alphabet and reading to math, writing and spelling. Select the worksheets you need, download, print out and get started in seconds! Download the fun skill-building worksheets by Kids Academy right now and give your little learner a fantastic head start on math, reading, writing and other vitally important skills. With our amazing collection of free printable worksheets and fun educational games, your kid will master a lot of useful skills in no time. Kids will also get a wonderful chance to enhance their attention improve their memory train their brain learn to concentrate boost their imagination develop creativity use logic practice their cognitive skills. The free printable worksheets on Kids Academy have been developed together with teachers and other specialists in children's early education. They are based on the famous Montessori Method. This highly effective approach to teaching helps learning kids establish a solid base for their future math, reading and writing skills in a fun and enjoyable way. The best educational games by Kids Academy are great for children that are just making their first steps in education as well as those who already know their numbers, letters and main geometric shapes. The printable worksheets are perfect for kids of different ages: toddlers (3 years old and under) preschoolers (2-4 years old) kindergarteners (3-5+ years old) Download and print out the free printable worksheets on Kids Academy - and learning math or handwriting will never be a chore for your little kid. The fun worksheets are full of entertaining brightly-colored images that are sure to put a smile on your child's face. With the educational games on Kids Academy, your little learner will get to practice a lot of important skills and have fun too. Your kid will love: amusing pictures vibrant colors inspiring tasks simple instructions Print out our free educational worksheets for kids and help your child get excited about learning! Check back soon because we're regularly updating our collection adding new free worksheets for kids and toddlers. Looking to play a friendly game of Farkle with friends or with your students in your classroom? I've got a free printable Farkle Score Sheet to help make your game play run smoothly. What is Farkle? Farkle is an incredibly fun and addictive dice game that is equally suitable for a fun family game night or a fun day in math class (or any class for that matter). I was first introduced to this game a few years ago after receiving it as a gift. I remember playing it with my sister soon after receiving it and really enjoying it. Years of living alone meant that it sat on the shelf and rarely got played. Now that there's a husband in the picture, I decided it was time I taught him to play Farkle! The game of Farkle is not super-complicated. If you buy a copy, you will likely be shocked at just how simple it is. The version I own features a cup for rolling dice that also doubles as game storage, six dice, and a set of rules in two different languages. If you have dice in your classroom, you don't even need to buy the game! On your turn, you will roll all six dice. Any scoring dice are set aside. If you want to keep that score, you stop. If you want to attempt to raise your score, you re-roll the non-scoring dice. If these re-rolled dice score you points, these points are added to your total. If you score no points with these newly rolled dice, you have "Farkled," and you lose all the points you had been accumulated. Points earned from previous rounds are safe. Farkle Scoring Guidelines Here is a visual summary I created of how you score points in Farkle. 3 of a kind, 4 of a kind, etc must be earned on a SINGLE roll. You may not combine the results of multiple rolls to earn these points. If you earn points from all six dice, you also get to roll again. You must score 500 points to "get on the board." And, the first player to reach 10,000 points wins. If you want to read the full instructions, here is a link. If you get to doing a lot of reading and research, you will soon learn that there are many different versions of the game with different scoring rules. As Shaun and I were playing Farkle, we found ourselves stopping the game to discuss and calculate various probabilities. For example, we often found ourselves in the situation where we had one die left that we could roll. What is the probability of Farkling with one die? Well, with one die, the only way to score is by rolling a 1 or a 5. We have a 1/3 chance of rolling a 1 or 5, so we have a 2/3 chance of farkling. If we have two dice, then our chance of farkling is (2/3)^2. If we have three dice, we have a (2/3)^3 chance of not rolling a 1 or a 5. Should an 8/27 chance of farkling be enough to keep you from risking it? We ended up playing four different rounds in a single day. Shaun said the game reminded him of Pass the Pigs which his family is a bit obsessed with. He said he actually prefers Farkle to Pass the Pigs because the game involves a bit more strategy. Of course, it still involves a lot of luck! Farkle Score Sheet After this day full of Farkle, I decided I definitely want to incorporate playing Farkle into our probability unit in the non-AP statistics course that I teach every other year. Even though I'm teaching trig instead of stats this year, I decided to go ahead and design a Farkle score sheet to use with my students. Here's what I came up with: The score sheet has all of the point combinations at the bottom to make it easy for my students to keep score. It also means that they can play by getting six dice out of my dice tub. No need for a rule sheet! After I had designed this score sheet, I remembered that I had recently purchased 11 x 17 dry erase pockets for my classroom that I hadn't had a chance to use for anything yet. I have a set of 9 x 12 dry erase pockets that we use for SO many different things. I'm excited to be able to make bigger reusable activities. I have a package of 11 x 17 cardstock that I use for making lots of posters, now I'll be able to use it to make jumbo sized activities as well! If you are looking to save a bit of money, you can also pick up a package of 11 x 17 sheet protectors for a much cheaper price! They won't be quite as durable, but students can still write and erase with their dry erase markers. So, I reformatted my 8.5 x 11 score sheet to make an 11 x 17 score sheet. Here are my new jumbo dry erase farkle score sheets ready to go. I was SO excited about these farkle score sheets, I had to take a selfie with them to post on twitter! Of course, when my students saw I had made these farkle score sheets, they insisted we try them out. Here are some action pics. This group used a plastic cup instead of the Farkle cup that came with my original game because another group was using it. I love that you can play this game with your students as long as you have access to dice! A few years ago, I asked my school to buy me 500 dice for my classroom. They have come in handy so many times since then. 10-sided dice Buy Now - Exploragons Buy Now - Geometiles Buy Now - plastic pentominos Buy Now - tangrams Buy Now - algebra tiles Buy Now - base ten blocks Buy Now - bingo chips Buy Now - coordinate plane geoboards Buy Now - dice Buy Now - fraction magnets Buy Now - foam dice Buy Now - linking cubes Buy Now - two-colored counters Buy Now - playing cards Buy Now - This post contains affiliate links. Addition, subtraction, multiplication, and division. All math teachers agree that their learners need to develop fluency with these facts. What is math facts fluency? It's the quick and effortless recall of math facts. If kids have to think for a minute before telling you that 5 x 6 = 30, they don't have math facts fluency. Why do kids need math facts fluency? Here are the two most important reasons. When kids know their facts automatically, they can do math more quickly. This becomes especially important in the higher grades. When kids have fluency with math facts, their brains are freed up to do more complex tasks - such as mental math and problem solving. Should I start with flash cards? While many people begin with this step, I don't encourage it. Instead, we need to focus first on an understanding of the math behind the facts. Kids need to explore addition as combining or adding to. Kids need to understand subtraction as separating or taking away. They need to see that multiplication is repeated addition of a number, and that division is dividing a number into equal parts or groups. If not flash cards ... what? I love beginning with a good book. (For example, check out this list of books that's great for introducing multiplication.) Continue with manipulatives. Even older kids who are starting to learn multiplication and division need to explore basic operations using small pieces before committing facts to memory. Some of my favorite manipulatives are teddy bear counters, 2-color counters, and unifix cubes. Small budget? Use pennies! Reinforce the concept in a variety of ways. In addition to manipulatives, try number lines, ten frames, and more. Pinterest is your friend. Go search for some fun ideas! I even did some searching for you, and I found these goodies: Build first grade math skills with legos with these tips from Frugal Fun for Boys and Girls. Not So Wimpy Teacher has some hands-ways to practice multiplication. Also see Math Geek Mama's round-up of ways to teach multiplication using arrays. Vary your instruction. Do whole class lessons, work with small groups, and provide opportunities for individual practice. Should I ever use flash cards? Of course! In fact, I recommend it - after students have an understanding of the math behind the facts and need to commit them to memory. (And 15 in a Row is a fantastic game to play with flash cards!) But don't make flash cards your only method for building math fact fluency. Try my free printable games! Free games for building math fact fluency At the end of this post, you'll get a math games pdf with 40 printable games for practicing basic facts. As you can see in the above image, each game features a string of facts along the border. In the center of each game is a Bingo board. Kids move around the board with a die, name the fact they land on, and find its answer on the Bingo board. They can color or dot it (we like Do-a-Dot markers, but they can be pretty messy - I don't recommend them for a classroom of kids). When they have five in a row, they're done! These games are perfect for the classroom, homeschool, or after-school practice at home. I hope your learners enjoy them!
